SUBJECT INDEX

The subject index conforms to the categories established in the OR/MS Index, 1952–1976, 1976–1981, and 1982–1987. The 1952–1976 cumulative index was compiled by Kneale T. Marshall and F. Russell Richards, the 1976–1981 cumulative index was compiled by Jon W. Tolle and Richard E. Stone, and the 1982–1987 cumulative index was compiled by Jon W. Tolle.

A

Analysis of algorithms
Chan, Lap Mui Ann, computational complexity, economic lot-sizing problem, 1058–1067.

C

Communications
Aardal, Karen, frequency assignment, 968–980.
Balakrishnan, Anantaram, network restoration planning, 617–635.
Barker, Harry G., III, circuit-switch network design and analysis, 764–771.
Computers/computer science
Keskinocak, Pinar, agents, 249–259.
L'Ecuyer, Pierre, software, 1073–1075.
Mookerjee, Vijay S., system design and operation, 345–357.
Computers, databases
Gopal, Ram, protecting confidential data, 501–516.
Cost analysis
Rosling, Kaj, inventory shortage costs, 1007–1017.
Crime
Blumstein, Alfred, 16–24.
Criminal justice
Blumstein, Alfred, penal system, 16–24.

D

Decision analysis
Dayanik, Savaş, Bayesian updating, 552–558.

Gazis, Denos C.,driver behavior in traffic flow, 69–77.
Kent, Glenn, applications, theory, looking back,122–124.
Keskinocak, Pinar, multiple criteria, 249–259.
Raiffa, Howard, theory and practice, risk, sequential, 179–185.
Smith, James E., properties of sequential models, 796–809.
Tseng, Chung-Li, applications, 297–310.

Decision analysis, multiple criteria
Keeney, Ralph L., assessing decision maker's value trade-offs, 935–945.

Decision analysis, sequential
Maatman, Arno, farmers' response to uncertain rainfall, 399–414.

Dynamic programming
Anily, Shoshana, 424–432.
Ding, Xiaomei, Bayesian Markov decision processes, 517–527.
Dreyfus, Stuart, history, 48–51.
Smith, James E., properties of stochastic models, 796–809.

Dynamic programming/optimal control, applications
Gans, Noah, hierarchical model for manpower planning, 991–1006.
Holt, Charles C., 96–99.

E

Econometrics
Post, Thierry, nonparametric efficiency analysis, 645–655.

Economics
Thomas, Panagiotis, resource allocation in integrated-services networks, 603–616.

Electricity market
Kamat, Rajnish, contracts with early notification, 835–850.

Environment
Rajaram, Kumar, pollution prevention, 751–763.

Exotic options
Kamat, Rajnish, 835–850.

F

Facility location
Camm, Jeffrey D., reserve site selection under uncertainty, 946–955.

Facilities/equipment
Brimberg, Jack, linear facility location, 1050–1057.

Facilities/equipment planning
Netessine, Serguei, application to services, 375–388.

Facilities/equipment planning, capacity expansion
Balakrishnan, Anantaram, installing spare capacities in communication networks, 617–635.

Facilities/equipment planning, location, continuous
Klamroth, Kathrin, location with a barrier and multiple criteria, 670–679.

Facilities layout
Savaş, Selçuk, barriers to travel, 1018–1031.

Facilities location
Savaş, Selçuk, restricted location problems, 1018–1031.

Facilities planning
Sherali, Hanif D., location continuous, 433–448.

Failure models
Stepanova, Maria, survival analysis applied to credit scoring models, 277–289.

Finance
Bertsimas, Dimitris, asset pricing, options, 358–374.
Tseng, Chung-Li, investment, 297–310.

Finance, investment
Puelz, Amy V., stochastic optimization for portfolio selection, 462–476.

Finance, portfolio
Markowitz, Harry M., origins of portfolio theory, 154–160.
Puelz, Amy V., stochastic optimization selection model, 462–476.

Financial engineering
Kamat, Rajnish, interruptible electricity, 835–850.

Forecasting
Wagner, Harvey M., inventory system effectiveness, 217–226.

G

Games/group decisions
Alpern, Steve, teams, 772–795.
Raiffa, Howard, negotiations, 179–185.
Singer, Joel I., bidding/auctions, 449–461.

Games/group decisions, noncooperative, stochastic
Anderson, E. J., equilibrium, 477–489.

Government energy policies
Anderson, E. J., electricity markets, 477–489.

H

Heuristic search
Patterson, Raymond A., solutions to problems in short time, 538–551.

HFC network design
Patterson, Raymond A., configuration of HFC topology, 538–551.

Hypercube queuing model, queue inference engine
Larson, Richard Charles, 135–145.

I

Incapacitation
Blumstein, Alfred, 16–24.

Industries
Arbib, Claudio, machinery, 923–934.
Singer, Joel I., restructuring of electric power, 449–461.

Industries, electric
Anderson, E. J., optimising generation, 477–489.

Industries, petroleum/natural gas
Gerchak, Yigal, exploration, 1068–1072.

Information systems
Mookerjee, Vijay S., analysis and design, 345–357.
Information systems, decision support systems
Gopal, Ram, answering ad-hoc queries, 501–516.
Input-output analysis
Post, Thierry, 645–655.
Integer programming
Camm, Jeffrey D., coverage models, 946–955.
Dahl, Geir, applications, image analysis, 490–500.
Inventory, perishable items
Cooper, William L., revenue/yield management, 720–727.
Inventory/production
Arrow, Kenneth J., dynamic inventory models under uncertainty, 1–2.
Chan, Lap Mui Ann, approximations for economic lot-sizing problem, 1058–1067.
Ding, Xiaomei, unknown demand, lost sales, censoring, optimal policies, 517–527.
Holt, Charles C., applications, 96–99.
Rosling, Kaj, operating characteristics, service rates, 1007–1017.
Scarf, Herbert E., personal reflections, 186–191.
Song, Jing-Sheng, multi-item, operating characteristics, stochastic models, 889–903.
Wagner, Harvey M., impact of forecasts on, 217–226.
Inventory/production, approximations/heuristics
Sun, Daning, near optimal solution using net present value, 528–537.
Inventory/production, multi-item/echelon/stage
Sun, Daning, mineral production and inventory network, 528–537.
Inventory/production, stochastic, multiproduct
Netessine, Serguei, substitution and demand correlation, 375–388.

J

Judicial legal/crime
Larson, Richard Charles, police and prosecution models, 135–145.

L

Large-scale linear programming
Baker, Steven F., multiperiod air transportation model for cargo and passengers, 582–602.
Linear programming
Gass, Saul I., on the solution of linear equations, computers, and their relationship to linear programming, 61–68.
Pastor, Jesús T., radial DEA models, 728–735.

M

Maintenance/replacement
Dayanik, Savaş, maintenance with minimal repair, 552–558.
Manufacturing
Arbib, Claudio, performance/productivity, 923–934.
Rajaram, Kumar, performance/productivity, 751–763.
Mathematics, combinatorics
Walshaw, Chris, multilevel refinement for combinatorial problems, 862–877.
Military
Barker, Harry G., III, defense systems, 764–771.
Bonder, Seth, Army OR history, combat models and simulations, military analyses, military decision issues, model development, military experimentation, process modeling, M & A lessons learned, 25–34.
Chen, Hsi-Mei, warfare models, 389–394.
Hughes, Wayne P., Jr., defense systems, force effectiveness, 103–111.
Military logistics
Baker, Steven F., optimizing strategic airlift, 582–602.
Multicommodity networks
Erera, Alan L., optimization with FIFO queues, 736–743.

N

Natural resources
Tseng, Chung-Li, energy, 297–310.
Natural resources, energy
Gerchak, Yigal, discovery process, 1068–1072.
Networks
Thomas, Panagiotis, pricing schemes for resource allocation, 603–616.
Networks, multicommodity
Agarwal, Yogesh K., telecommunications network design, 333–344.
Networks/graphs
Dahl, Geir, applications, 490–500.
Networks/graphs, heuristics
Walshaw, Chris, meta-heuristic for TSP, 862–877.
Networks/graphs, multicommodity
Chardaire, P., solution of network routing problems, 260–276.
Nonlinear algorithms
Mulligan, Ann E., interior point method, 636–644.
Nonlinear programming
Rajaram, Kumar, iterative procedure, 751–763.
Nonparametric statistics
Pastor, Jesús T., nonparametric DEA test of model specification, 728–735.

O

Operations research applied to New York City
Larson, Richard Charles, 135–145.
Optimization
Bertsimas, Dimitris, semidefinite, convex optimization, 358–374.
Organizational studies
Gazis, Denos C., performance and improvement of traffic systems, 69–77.

Organizational studies, manpower planning
Gans, Noah, MDP staffing model with learning and turnover, 991–1006.

P

Philosophy of modeling
Cooper, W. W., modeling for use, 35–41.
Holt, Charles C., corporate, 96–99.
Planning, location, continuous
Brimberg, Jack, three dimensions, 1050–1057.
Probability
Chen, Hong, diffusion, 1032–1049.
Mookerjee, Vijay S., stochastic model applications, 345–357.
Rosling, Kaj, renewal processes, 1007–1017.
Whittle, Peter, applications (Great Britain), historical survey and bibliography, 227–239.
Probability distributions
Ghosh, Soumyadip, copulae, 820–834.
Probability models
Gerchak, Yigal, 1068–1072.
Probability, stochastic model applications
Cooper, William L., 720–727.
Production application
Rajaram, Kumar, process industry, food-processing sector, 680–691.
Production heuristics
Rajaram, Kumar, Lagrangian heuristic, operational heuristic, 680–691.
Production planning
Anily, Shoshana, single machine, lot sizes, 424–432.
Rajaram, Kumar, product cycling with yield uncertainty, 680–691.
Production/scheduling
Arbib, Claudio, cutting stock/trim, 923–934.
Chen, Hong, approximations/scheduling, 1032–1049.
Keskinocak, Pinar, multiple machine, cutting stock/firm, 249–259.
Production/scheduling, approximations, heuristic
Dai, J. G., fluid model, performance bound, bottleneck stations, 692–707.
Production/scheduling, cutting stock
Menon, Syam, multimachine order allocation, 324–332.
Production/scheduling, sequencing, stochastic
Dai, J. G., job shop, makespan, re-entrant, 692–707.
Professional
Cooper, W. W., OR/MS implementation, 35–41.
Professional: comments on
Arrow, Kenneth J., 1–2.
Bixby, Robert E., 3–15.
Blumstein, Alfred, 16–24.
Bonder, Seth, 25–34.
Cooper, W. W., 35–41.
Dantzig, George B., 42–47.
Dreyfus, Stuart, 48–51.
Flagle, Charles D., 52–60.
Gass, Saul I., 61–68.
Gazis, Denos C., 69–77.
Gomory, Ralph E., 78–81.
Haley, K. Brian, 82–88.

Thomas, Panagiotis, nonlinear, algorithms, 603–616.
Programming algorithms
Caprara, Alberto, Lagrangian relaxation, heuristics, 851–861.
Programming, integer
Aardal, Karen, comparison of algorithms, 968–980.
Balakrishnan, Anantaram, capacity planning for telecommunication networks, 617–635.
Owen, Jonathan H., remodeling of general integer variables, 810–819.
Sherali, Hanif D., reformulation-linearization technique, asymmetric traveling salesman problem, Miller-Tucker-Zemlin, tight relaxations, precedence constrained asymmetric traveling salesman problem, 656–669.
Programming, integer, applications
Menon, Syam, decomposition, 324–332.
Programming, linear
Cooper, W. W., 35–41.
Markowitz, Harry M., sparse matrices, 154–160.
Programming, linear, large-scale systems
Chardaire, P., solution of multicommodity flow problems, 260–276.
Programming, multiple criteria
Klamroth, Kathrin, location with a barrier, 670–679.

Programming, stochastic
Berkelaar, Arjan, decomposition and interior point methods, 904–915.
Maatman, Arno, application of recourse model, 399–414.
Puelz, Amy V., convergence model for portfolio selection, 462–476.

Q

Queues
Chen, Hong, approximations and diffusion models, 1032–1049.
Jackson, Jim, networks, 112–113.
Park, Sungmin, simulation of queueing networks, 981–990.
Queues, algorithm
Barker, Harry G., III, network algorithm, 764–771.
Queues, approximations and limit theorems
Asmussen, Søren, effect of modulation on probability of a long wait, 559–565.

R

Reliability
Block, Henry W., burn-in, bathtub curves (life distributions), 290–296.
Reliability, quality control
Tagaras, George, statistical process control using adaptive charts, 878–888.
Risk
Stepanova, Maria, estimating credit risk for personal loans, 277–289.

S

Search and surveillance
Alpern, Steve, rendezvous search, 772–795.
Alpern, Steve, search for agent of unknown aims, 311–323.
Search theory
Jaillet, Patrick, 744–745.
Simulation
Chick, Stephen E., statistical analysis, 566.
L'Ecuyer, Pierre, random number generation, random variable generation, 1073–1075.
Nance, Richard E., discrete event simulation, 161–172.
Park, Sungmin, efficient estimation of cycle time-throughput curves, 981–990.
Simulation, applications
Walshaw, Chris, optimization by multilevel refinement, 862–877.
Simulation, languages
Markowitz, Harry M., SIMSCRIPT, 154–160.
Simulation, random variable generation
Ghosh, Soumyadip, random vector generation, 820–834.
Statistical analysis
L'Ecuyer, Pierre, 1073–1075.
Statistics
Chick, Stephen E., sampling, Bayesian, 566.
Dahl, Geir, Bayesian, 490–500.
Statistics, Bayesian
Tagaras, George, updating the state of a monitored manufacturing process, 878–888.

T

Traffic models
Erera, Alan L., control of freeway systems, 736–743.
Transportation
Caprara, Alberto, train timetabling, railway, 851–861.
Chan, Lap Mui Ann, less than truckload cost, 1058–1067.
Laporte, Gilbert, stochastic vehicle routing, 415–423.
Powell, Warren B., model implementation issues, 571–581.
Sherali, Hanif D., models/location, 433–448.
Tree-star
Patterson, Raymond A., network architecture, 538–551.

U

Utility/preference, multiattribute
Keeney, Ralph L., quantifying preferences, 935–945.

V

Valid inequalities, facets, lotsizing
Magnanti, Thomas L., 708–719.

W

Water resources
Mulligan, Ann E., groundwater contamination control, 636–644.
